

Summit Hydraulic PowerPAK /ACCUMULATOR

POWERPAK/ACCUMULATOR

Summit's engineered hydraulic PowerPAK systems are a very cost effective solution for actuating valves in remote locations or where a pneumatic cylinder or electric actuator is not feasible.

The basic hydraulic system consists of standard gear pump(s), motor(s), accumulator(s) and reservoir choices. Summit offers the availability of valving, controls and accessories to complete the hydraulic circuit and enhance the operation of the PowerPAK.

Available options:

- A choice of working pressures
- AC operation
- Motor starters
- Filters, gauges and quick couplings
- Larger hydraulic reservoirs
- Custom support structure
- Electrical controls and SS panel
- Single or dual valve operation

PowerPAK AC/DC

Summit's engineered hydraulic PowerPAK AC/DC systems are a very cost effective solution for actuating valves in remote locations or where a pneumatic cylinder or electric actuator is not feasible.

The basic hydraulic system consists of standard pump(s), motor(s) and reservoir choices. Summit offers the availability of valving, controls and accessories to complete the hydraulic circuit and enhance the operation of the PowerPAK.

Available options

- A choice of working pressures
- AC, DC or AC/DC operation
- Motor starters
- Filters, gauges and quick couplings
- Larger hydraulic reservoirs
- Mounting bracket (to valve or support structure)
- Electrical controls (SS panel c/w switches and indicator lights)
- PLC control
- Single or multiple valve operation

Take CONTROL

PowerPAK DC

Summit's engineered hydraulic PowerPAK DC systems are a very cost effective solution for actuating valves in remote locations or where a pneumatic cylinder is not feasible.

The basic hydraulic system consists of standard gear pump, motor (DC) and reservoir choices. Summit offers the availability of valving, controls and accessories to complete the hydraulic circuit and enhance the operation of the PowerPAK.

Available options:

- A choice of working pressures
- Filters, gauges and quick couplings
- Larger hydraulic reservoirs
- Mounting bracket (to valve or support structure)
- Electrical controls (SS panel c/w switches and indicator lights)
- Single or dual valve operation
