- flow meters
- fluid mixing systems
- pressure sensors
- areation systems
- expansion joints

THE RIGHT PEOPLE

When we say "At Summit we care" we mean it! Our energetic professionals will listen and understand your application needs so that we can recommend and deliver the right solution at a competitive cost. Our staff specialize in the fields of reliability, commerce and engineering to provide the best advice, service and support. Trust the people at Summit to deliver what you need.

THE RIGHT SOLUTIONS

When you bring the right people and the right products together, great things happen. Whether you have a complex need requiring flow modeling from our engineering group, or a simple request for a quick valve delivery from our large inventories, you can count on Summit to deliver the right solution. Our valve experts will consult with you to analyze your system requirements to come up with the right solution every time.

AT SUMMIT WE CARE

The value we provide goes beyond the products we represent. We offer training and industry specific application knowledge. Our mission is to be your preferred flow control supplier. Integrity is the most important of our values - it is at the core of every relationship.

INDUSTRIES SERVED

Mining & Oil Sands

Mining slurries can wear out valves and shut your plant down in a heartbeat. Summit delivers expert advice and solutions to keep your facility up and running.

Water & Wastewater Treatment

Water & wastewater treatment is serious business, and Summit is up to the task with many great products to suit your needs. Our company was founded on technical specialization in this field.

Industrial

If your business involves chemical processing, refining, pipelines, power generation, pulp and paper, food and beverage, HVAC or transportation, Summit's flow control expertise will impress you.

GREEN SUPPLIER - IMPROVING THE ENVIRONMENT WE LIVE IN

At Summit we care about the environment in which we live. That's why we constantly increase our environmental awareness and reduce our carbon footprint with energy efficient products such as: zero bleed pneumatic positioners; low thrust slurry valves; equipment to clean oil sands tailings ponds so that water and land can be safely returned to its natural state; high quality valves that ensure the safety of our public drinking water; and carbon credits for energy efficient initiatives. At Summit, we work green and live clean.

Our head office is proud to be ISO certified
