

BRITISH COLUMBIA REGION - INSTRUMENTATION SOLUTIONS

Unit 1120 - 1971 Broadway St. | Port Coquitlam, BC V3C 0C9 Ph: 778-285-7590

- Resilient seated butterfly valves
- HP butterfly valves
- Triple offset valves
- Actuators & accessories
- Knifegate valves

- Proximity Sensors
- Sensor testers, tools and mounting accessories
- Logic control units
- Isolated barriers

- Control Valves - globe, plug, v-port, butterfly
- Actuators
- Positioners
- Instrumentation

- Ball valves
- V-Control ball valves
- Actuators & accessories

- Radiometrics
- Leak Detection
- Alarm Display
- Signal Conditioning - I/O
- SERS

- Electrochemical, infrared and catalytic gas detectors
- UV/IR Fire detectors
- Fire and gas detection controllers

- Pressure/Temperature gauges
- Valve manifolds
- Switches
- Thermometers
- Force measurement solutions

- Electric, pneumatic & hydraulic valve actuators and control systems
- Valve gearboxes
- Precision control instruments

- Engineered control valve for abrasive applications
- Field replaceable wear parts
- The toughest orific plate in the world

What we do

Over the last two decades, Summit Valve has expanded to include complete valve, actuator and accessory packages, as well as engineering and startup services. We offer innovative products that reduce your cost of ownership and improve performance.

The value we provide is more than the products we represent. We offer training on our products, as well as industry specific application knowledge. Our mission is to be your technical resource for all your flow control needs.

Finally, integrity is the most important of our values - It is at the core of every relationship.
