AT SUMMIT YOU WILL FIND THE RIGHT COMBINATION TO SATISFY YOUR NEEDS...

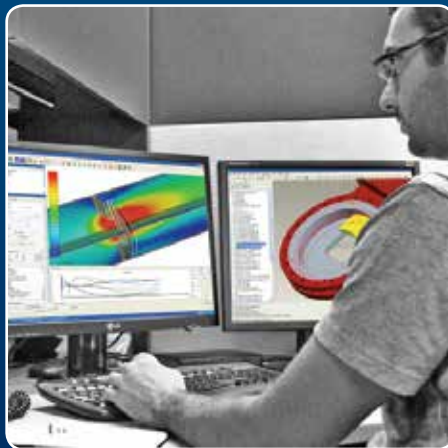

THE RIGHT PEOPLE

When we say “At Summit we care”, we mean it! It is because we care that we are a successful Company. With decades of experience on staff, we provide industry leading expertise in isolation and control valve applications, valve automation, control systems, and instrumentation solutions. Trust the people at Summit to deliver what you need, when you need it.

THE RIGHT PRODUCTS

We take care of our customers by partnering with top quality suppliers. Summit is proud to represent a complete range of high quality products. We provide industry leading expertise in isolation and control valve applications, valve automation, control systems, and instrumentation solutions. Our strong relationships with innovative manufacturers, combined with excellent team members, enable us to deliver the right products.

THE RIGHT SOLUTIONS

When you bring the right people and the right products together, great things happen. At Summit Valve and Controls, our strategy is anchored by our goal to have a close working relationship with our customers where the buyer and seller see each other as business partners. We accomplish this by understanding our customer's needs and requirements, and offering products, solutions and services that continuously astonish those we serve. Whether it is a complex need requiring flow modeling from our engineering group, or a simple request for a quick valve delivery from our inventory, you can count on Summit to deliver the right solution.

AT SUMMIT WE CARE

The value we provide goes beyond the products we represent. We have a history of successful projects, product performance, and engineered solutions that work. Our project management team and technical specialists provide value at all stages of your project, from FEED (Front End Engineering Design) and detailed engineering to commissioning and after-sales support.

Our mission is to be your preferred flow control supplier and provide engineered solutions that work. Integrity is the most important of our values; it is at the core of every relationship.
