

Summit Valve and Controls

ANNOUNCEMENT

We are pleased to announce that **Summit Valve and Controls** has added **Golden Harvest Inc.** water control products to our lineup. Built in accordance with AWWA standards, **Golden Harvest Inc.** offers a complete line of gate products that will complement our existing portfolio of valves, valve automation, and process instrumentation. **Golden Harvest Inc.** products are used in a variety of industries including Water & Wastewater treatment, Power Generation, and Irrigation.

Golden Harvest, Inc.
Golden Gates™

Since 1983, **Golden Harvest Inc.** has been manufacturing a complete line of stainless steel and aluminum water control products including slide gates, weir gates, flap gates, and level control gates. Each gate is designed and built to customer specifications in their manufacturing facility located in Burlington, Washington.

The agreement is effective September 15, 2020 and offers representation of all **Golden Harvest Inc.** products in all Summit territories in British Columbia, Alberta, Saskatchewan, and Manitoba.

With headquarters located in Edmonton and regional offices in Port Coquitlam, Saskatoon, and Winnipeg, **Summit Valve and Controls** has been a key player in the western Canadian market for over 28 years. Our customer service and support network has been a key component to our success, and we look forward to working with the **Golden Harvest Inc.** team to grow their complete line of quality water control products in all our assigned territories and markets.
